Syllabus for Statistics 549

Spring Semester 2016

Time & Location: Tuesday & Thursday 10:50-12:05 in Abercrombie A121

Required Text: Functional Data Analysis, by Ramsey and Silverman

Instructor: Dennis D. Cox

Office: 2095 Duncan Hall

phone: 6007 (longphone: +1-713-348-6007)

Office Hours: TBD & by appointment

Description: An introduction to functional data analysis

Graders: Robert Kosar

Content: Chapters 1-11, plus topics, time permitting.

Preferred Prerequisites: Stat 533, Stat 581, and Stat 541.

Grading: 50% Homework; 50% Term Project.

Homework Policies: You may discuss the homework with your fellow students in detail. When you actually write up your solutions, you must do this by yourself. The objective is to allow you to learn from interactions with fellow students, but to avoid direct copying of solutions. Late homeworks are accepted for 1 week after the due date with 50% penalty. You may request an extension by email any time before the due date of the homework.
